				<p>definition of emotivity was proposed and the specific nature of this category was revealed; the basic principles of the relationship of emotivity with the borderline categories of expressiveness and evaluativeness were established; methods of representation of emotive semantics, including private (level) mechanisms of linguistic expression of emotions, were described; patterns of lexical explication were characterized, the criteria for distinguishing several classes of emotive lexemes are defined.</p> <p>2. The main trends of semantic evolution of emotive vocabulary and phraseology of the Russian language during the XI–XX centuries in projection on the material of the Indo-European and Common Slavic proto-languages, as well as modern Slavic languages are established.</p> <p>3. A dynamic model of meaningful changes in the emotive vocabulary and phraseology of the Russian language is constructed, taking into account both linguistic and extralinguistic factors,</p> <p>4. The most important parameters of linguistic modeling of emotions in a literary text (causality, temporality, intensity and external expression of emotions) are determined, which are largely universal in nature, since they reflect the main ontological characteristics of internal states; the author's individual specificity of qualitative and quantitative representation of these parameters is established, due, on the one hand, to the systemic relations of emotives that are projected on the semantic space of the text, on the other – the associative connections of these units within</p>

				<p>specific works.</p> <p>5. The mechanisms of semantic derivation in different languages (including genetically and typologically distant ones) are systematically analyzed; cognitive models underlying the derived meanings of predicates of various classes in related/unrelated languages (Slavic, Germanic, Turkic) are determined; universal/unique ones are identified with the involvement of lexicographic sources and media texts.</p> <p>6. The analysis of the linguistic and cultural specifics of the phraseology of a number of languages (Slavic, Turkic, Chinese), including the dominant images underlying the internal form of phraseological units is carried out; it is revealed that these images correlate with the corresponding codes of culture, which suggest a figurative interpretation of the realities of the world through the prism of knowledge about them.</p>	
8.	Magirovskaya	Oksana	Siberian Federal University	Cognitive mechanisms of discursive construction; Discursive conceptualization of socio-cultural knowledge; Gesture conceptualization	<a href="https://www.sfu-kras.ru/files/Magirovskaya_O.V._Struktura_nauchnogo_profilya_portfolio_PNR_2023_ENG.pdf">https://www.sfu-kras.ru/files/Magirovskaya_O.V._Struktura_nauchnogo_profilya_portfolio_PNR_2023_ENG.pdf</a>
9.	Nagel	Olga	National Research Tomsk State University	Research of cognitive mechanisms of perception, processing and use of language	<a href="http://tsuod.tilda.ws/nagel_eng">http://tsuod.tilda.ws/nagel_eng</a>
10.	Obdalova	Olga	National Research Tomsk State University	Theoretical and methodological foundations of the theory, methodology and technology of foreign language education at all levels of the education system in the context of domestic and foreign educational practice. Study of various aspects of foreign language	<a href="http://tsuod.tilda.ws/obdalova_eng">http://tsuod.tilda.ws/obdalova_eng</a>
